

Eden Project - Cornwall

Client: Eden Project
Configuration: Complete Kitchen Ventilation Project
Materials: Welded Type 304 Stainless Steel
Filters: Britstream Stainless Steel Baffle Filters

The Eden Project in Cornwall has recently installed additional catering facilities to serve the increasing number of visitors to this successful millennium project. Working closely with Space Catering Equipment, the designers of the catering facility, Britannia designed and installed a complete kitchen ventilation scheme, which included a unique, environmentally friendly and cost efficient odour filtration system.

In addition to the ventilation canopies, fans and ductwork, Britannia also supplied the services distribution units, and the fire suppression system.

The complete system was designed, manufactured and installed by Britannia in strict compliance with the new standard for kitchen ventilation, DW171, against tight deadlines.

Britannia provides free design advice and will prepare design details for your project, free of charge.

For a refreshing approach to kitchen ventilation.
